PROFESSIONAL EXPERIENCE

JR. DevOps Engineer - CHRP-INDIA Pvt.Ltd | April 2026 - Present
Hyderabad

CHRP Simulation Platform | Microservices Architecture

- Deployed and managed microservices across a **4-node Amazon EKS cluster**, handling Deployments, Ingress rules, and namespace isolation.
- Built **secure, multi-stage Docker images** with minimal OS footprint and managed container registries in **Amazon ECR**.
- Automated **Dev, Stage, and Prod environment deployments** via Jenkins CI/CD pipelines, integrating **SonarQube** (SAST) and **OWASP ZAP** (DAST) for code quality and security scanning and reducing vulnerabilities by **25%**
- Monitored cluster metrics and application health using **Prometheus & Grafana**; managed sensitive credentials securely via **AWS Secrets Manager**.

Skill Bridge LMS Application | Monolithic (Client: Schneider Electric)

- Provisioned **multi-environment AWS infrastructure** (VPC, EC2, ALB, ASG, RDS, S3) using reusable **Terraform modules**, ensuring consistent deployments across environments.
- Containerized and deployed frontend and backend components using **Docker Compose**, backed by a **multi-region AWS RDS** database for high availability.
- Optimized media delivery using **AWS CloudFront with HLS format**, achieving zero downtime and reducing backend server load significantly.

- Implemented **AWS CloudWatch** alerts for infrastructure performance tracking and application health monitoring.

CHRP Internal Application | Legacy

- Deployed full application stack and database on an **Ubuntu-based Hostinger server** using Docker.
- Automated regular database backups to **AWS S3** using custom **Bash shell scripts**, reducing manual effort by **40%**.
- Configured **AWS S3 + CloudFront** for secure, low-latency media storage and content delivery.
